

Pimpri Chinchwad Education Trust's
**PIMPRI CHINCHWAD COLLEGE OF
ENGINEERING**

SECTOR NO. 26, PRADHIKARAN, NIGDI, PUNE 411044

An Autonomous Institute Approved by AICTE and Affiliated to SPPU, Pune

**Curriculum Structure of
B. Voc. Industrial Refrigeration and Air
Conditioning
and**

**Syllabus of B. Voc. Program
(Course 2023)**

(Approved by Board of Studies, B. Voc. Program, PCCoE)

Effective from Academic Year 2023-24

Institute Vision

To be one of the top 100 Engineering Institutes of India in coming five years by offering exemplarily Ethical, Sustainable and Value Added Quality Education through a matching ecosystem for building successful careers.

Institute Mission

1. Serving the needs of the society at large through establishment of a state-of-art Engineering Institute.
2. Imparting right Attitude, Skills, Knowledge for self-sustenance through Quality Education.
3. Creating globally competent and Sensible engineers, researchers and entrepreneurs with an ability to think and act independently in demanding situations.

Quality Policy

We at PCCOE are committed to impart Value Added Quality Education to satisfy the applicable requirements, needs and expectations of the Students and Stakeholders. We shall strive for academic excellence, professional competence and social commitment in fine blend with innovation and research. We shall achieve this by establishing and strengthening state-of- the-art Engineering and Management Institute through continual improvement in effective implementation of Quality Management System.

Course Syllabus

Semester-I

Program: B. Voc. (Industrial Refrigeration & Air Conditioning)				Semester: I		
Course: Basics of Refrigeration & Air Conditioning				Code: VRC21101		
Teaching Scheme			Evaluation Scheme			
Lecture	Hours	Credit	IE 1	IE 2	ETE	Total
3	3	3	25	25	50	100
Course Objectives: To provide the fundamentals of sensors and signal conditioning. <ol style="list-style-type: none"> 1. Identify the important modes of heat transfer and their applications 2. Learning the fundamental principles and different methods of refrigeration and air conditioning. 3. Comparative study of different refrigerants with respect to properties, applications and environmental issues 4. Study of the various equipment-operating principles, operating and safety controls employed in refrigeration air conditioning systems 						
Course outcomes: After learning the course, student will be able to <ol style="list-style-type: none"> 1. Understand the basic heat conduction, convection and radiation equation for steady, one dimensional thermal systems. 2. Illustrate the fundamental principles of refrigeration , Obtain cooling capacity and coefficient of performance by conducting test on vapour compression refrigeration systems 3. Understand the different types of refrigerant for various applications. 4. Understand vapour absorption system 5. Illustrate the fundamental principles air conditioning system 6. Understand the refrigeration and air conditioning systems for different application 						
Detailed Syllabus:						
Unit	Description					Duration (45 Hrs)
1	Mode of Heat Transfer Conduction:-Law of Conduction, Heat Transfer Through the Wall Convection:-Law of Convection, Type of Convection, Heat Transfer to Composite Wall Radiation: Laws of Radiation, Basic Terminology Used in Radiation. Simple Numerical on Conduction, Convection & Radiation.					7
2	Introduction to Refrigeration Definition, Units of refrigeration, Various Methods of Refrigeration. Standard Vapour Compression Cycle, COP of Cycle, Effect of Temperature and Pressure on COP of the cycle. Simple Numerical Problems with the Help of P-H Diagram.					10
3	Introduction to Refrigerant Definition, Classification of Refrigerants, Properties of Refrigerant, Qualities of Good Refrigerants, Secondary Refrigerants. Safe Working Conditions with Refrigerants. Impact of Refrigerants on Environments					6
4	Vapour Absorption System VAS Cycle of Operation, Lithium Bromide Absorption Refrigeration System, Ammonia Absorption Refrigeration System					6

5	<p>Introduction to Air Conditioning Introduction, Meaning of Air Conditioning, Psychrometric & Psychrometric Properties. Psychrometric Chart & Processes. Requirement of Comfort Air Conditioning</p>	10
6	<p>Application of Refrigeration & Air conditioning Construction & Working of Household Refrigerator, Summer Air Conditioning System, Winter Air Conditioning System</p>	6
<p>Text Books:</p> <ol style="list-style-type: none"> 1. Dossat Roy J., <i>Principles of Refrigeration</i>, Pearson education, New Delhi, 2014. 2. Stoecker W. F. and J. W. Jones, <i>Refrigeration and Air Conditioning</i>, McGraw hill education, 2016. <p>Reference Books:</p> <ol style="list-style-type: none"> 1. ARORA C.P., <i>Refrigeration and Air Conditioning</i>, Dhanpat Rai and Co.Pvt. Ltd, 2013. 2. Ananthanarayan P. N., <i>Basic Refrigeration and Air Conditioning</i>, Tata McGraw hill, 2016. 3. Manohar Prasad, <i>Refrigeration and Air Conditioning</i>, New age international Pvt. Ltd., New Delhi, 2015. 4. Khurmi R.S. and Gupta J.K., <i>A Text Book of Refrigeration and Air Conditioning</i>, S. Chand & Company, 2018. 5. Arora S.C., and Domkundwar S., <i>Refrigeration and Air Conditioning Data Book</i>, Dhanpatrai and Sons, 2012. 		

Program: B. Voc. (Industrial Refrigeration & Air Conditioning)					Semester: I	
Course: Engineering Drawing					Course Code: VRC21201	
Teaching Scheme			Evaluation Scheme			
Lecture	Hours	Credit	IE 1	IE 2	ETE	Total
3	3	3	25	25	50	100
Course Objectives:						
<ol style="list-style-type: none"> 1. To develop imagination of physical objects to be represented on paper for engineering communication. 2. To develop the interpretation and manual drawing skills. 3. To develop the physical realization and manual drawing skill 						
Course Outcomes:						
After learning the course, students will be able to						
<ol style="list-style-type: none"> 1. Understand the drawing sheets, dimensioning and tolerances 2. Understand and draw the projections of point and line on reference planes, inclined planes. 3. Understand the orthographic projections, first and third angle projections methods, draw orthographic views 4. Understand and draw the Isometric scale, construction of Isometric view of simple objects 5. Understand and draw the development of lateral surfaces of simple solids. 6. Understand and draw the free hand sketches of standard components of machine. 						
Detailed Syllabus:						
Unit	Description					Duration (45 Hrs)
1	Introduction Layout of drawing sheets, sizes of drawing sheets, different types of lines used in drawing practice, Dimensioning – linear, angular, aligned system, unidirectional system, parallel dimensioning, chain dimensioning, location dimension and size dimension. Tolerances – methods of representing tolerances, unilateral and bilateral tolerances, tolerance on linear and angular dimensions, geometrical tolerances.					7
2	Projection of Line and Planes Introduction, Projection of points – points on the different quadrants and on the reference planes. Projection of straight lines (only first angle projection method) – Line on the reference planes - perpendicular to one plane and parallel to other plane – inclined to one plane and parallel to the other plane – parallel to both the planes –inclined to both the planes. Projection of planes (only first angle projection method) - Types of planes, Projection of planes perpendicular to both the reference planes, Perpendicular to one plane and parallel to other plane, Perpendicular to one plane and inclined to the other plane, Inclined to both planes.					8

3	Orthographic Projections Reference planes, types of orthographic projections – First angle projections, Third angle projections, methods of obtaining orthographic views by First angle method.	6
4	Isometric View Introduction, Isometric scale, construction of Isometric view of simple objects from given orthographic.	8
5	Development of Lateral Surfaces of Solids Introduction, Development of lateral surfaces of Cone, Cylinder, Pyramid and Prism.	8
6	Freehand Sketching and introduction of AutoCAD software Free hand sketching -- FV and TV of standard machine parts – Hexagonal headed nut and bolt, foundation bolts, shafts, keys, couplings, springs, human heights, doors, windows	8
<p>Text Books:</p> <ol style="list-style-type: none"> 1. Bhatt N.D., and Panchal V.M., <i>Engineering Drawing</i>, Charotar Publishing House, 2010. 2. Agrawal B., and Agrawal C M “<i>Engineering drawing</i>”, Tata McGraw Hill Education Private Limited., 2014. <p>Reference books:</p> <ol style="list-style-type: none"> 1. Gill P.S., <i>Engineering drawing</i>, S.K. Kataria & Sons., 2016. 2. Gopalakrishnan.K.R., <i>Engineering Drawing</i>, (Vol.I and Vol.II), Dhanalakshmi publishers, 1970. 3. Venugopal. K, and Sreekanjana G., <i>Engineering Graphics</i>, New Age International Publishers. 2019. 4. Natarajan K. V., <i>A text book of Engineering Drawing Graphics</i>. Dhanalakshmi Publishers, 2008. 		

Program: B. Voc. (Industrial Refrigeration & Air Conditioning)				Semester: I		
Course: Introduction to Logistics Management				Course Code: VLM21201		
Teaching Scheme			Evaluation Scheme			
Lecture	Hours	Credit	IE 1	IE 2	ETE	Total
3	3	3	25	25	50	100
Course Objectives:						
<ol style="list-style-type: none"> To develop knowledge about key elements of logistics processes,. To understand about the interconnectedness of business units and organizations (via the flow of products, money, and information) through Logistics Management. To incorporate and learn the critical elements of logistics management processes based on the most relevant application in forward-thinking companies. To incorporate a meaningful focus on the rate of change occurring in business today, and more specifically, in business logistics. 						
Course Outcomes:						
After learning the course, students will be able to						
<ol style="list-style-type: none"> Understand the fundamentals & various aspects of Logistics management . Understand the critical elements of logistics Strategies. Apply the rationale process of planning and resourcing in Logistic Management. Develop in depth knowledge about the vehicles costing and related documentation Understand the concept of Concept of Integrated Logistics and Quality Customer Service Apply current trends & Technologies of Logistics Information Systems . 						
Detailed Syllabus						
Unit	Description					Duration (45 Hrs)
1	Introduction to Logistics Concept and Definition of Logistics, Evolution of Logistics, Objectives of Logistics, Elements of Logistics, Importance of Logistics, Types of Logistics Process of Logistic Cycle Functions of Logistics, Concept and definition of Logistics Management, Key logistics efficiency metrics of Logistics Management, Model in Logistics Management., Role of logistics management, Effective Logistics and Competitive Advantage. Integrated Logistics Management, Logistics interface with marketing, Retail logistics. Case –Study – Mumbai Dabbawalas					8
2	Logistics Strategies Concept and definition of Manufacturing Logistics, three key components to effective manufacturing logistics, Common Challenges in Manufacturing Logistics. What is 4PL and what is 3PL? The difference between 4PL and 3PL, Concept and Definition of Logistics Strategy, Strategic role of logistics, Designing & implementing logistical Strategies. Strategy options: Lean strategies, Agile strategies & other strategies. Emerging concepts in logistics. Outsourcing Logistics: Reasons for outsourcing, Third party logistics provider, and Fourth party Logistics providers (4PL), Role of logistics providers. Case –Studies on Lean & Agile Strategies					8
3	Planning and Resourcing Need for Planning, Fleet management , Main types of road freight transport, Transport resource requirements, Vehicle routing and scheduling Vehicle Selection: Types of vehicle, Types of operations, Load types and characteristics, Main types of vehicle body, Implications of vehicle selection ,Vehicle acquisition.					7

4	<p>Vehicle Costing Reasons for road freight transport vehicle costing , Main types of costing systems, Vehicle standing costs, Vehicle running costs, Overhead costs, Costing the total transport operation Documenting and Information Flow: Advices, Planning, FTL, LTL, Documentation– Road Receipts/Truck Receipts/Waybills(RR/LR) Consignment note CMR(EU&Canada) Booking – Invoicing & Information Flow - Long Haul – Coordination with terminals Exceptional Loads (Project Cargo). Legislation: Operator licensing – Driver licensing – Driver’s hours regulations. Case Studies on Documentation of Vehicle Planning</p>	8
5	<p>Integrated Logistics & Quality Customer Service Concept of Integrated Logistics, Customer service, importance, elements, the order cycle system, distribution channels, Functions performed, Types, designing. Case studies</p>	7
6	<p>CURRENT Contours Logistics Information Systems – Need, Characteristics and Design. E-Logistics – Structure and Operation. Logistics Resource Management e-LRM. Automatic Identification Technologies. Reverse Logistics – Scope, design and as a competitive tool - Green Logistics</p>	7
<p>Text Books</p> <ol style="list-style-type: none"> David J. Bloomberg, Stephen Lemay, <i>Logistic</i>, 8th edition, Pearson Education Dorling Kindersley; 1st edition, 2015. Satish C. Ailawadi& Rakesh Singh, <i>Logistics Management</i>, 2ndEdition, Prentice-Hall of India Pvt Ltd., New Delhi,2013. <p>Reference books:</p> <ol style="list-style-type: none"> F. Robert Jacobs, William Berry , D. Clay Whybark , <i>Manufacturing Planning and Control for Supply Chain Management</i>, McGraw-Hill Professional Publishing. Manish Govil and Marie Proth, <i>Supply Chain Design and Management: Strategic and Tactical Perspectives</i>, JeanAcademic Press. 		

Program:	B. Voc. (Industrial Refrigeration & Air Conditioning)			Semester: I		
Course:	Applied Science			Code: VRC21301		
Teaching Scheme			Evaluation Scheme			
Lecture	Hours	Credit	IE 1	IE 2	ETE	Total
2	2	2	20	20	40	80
Course Objectives:						
To develop an ability of understanding the phenomena with the help of science concepts and relate them to applications.						
Course Outcomes:						
After learning the course, students will be able to						
1. Understand the quality of water, its softening techniques and quality of fuel and its different types.						
2. Interpret the optical phenomena - reflection, refraction, polarization with wave nature of light.						
3. Understand what is corrosion, its types and its consequences in environment.						
4. Summarize production of ultrasonic waves and their applications.						
Detailed Syllabus:						
Unit	Description					Duration (30Hrs)
1	Water Impurities in water, methods of their removal, hardness of water, its types and units. Chemical analysis of water by determination of hardness by EDTA method and its numericals. Disadvantages of hard water in boilers, Water softening techniques: Permutit Water purification by reverse osmosis Fuel and their Classification Definition, characteristics, classification into solid, liquid and gaseous fuel. Calorific value of fuels – GCV, NCV and their relation. Coal, its types and their properties, proximate analysis and ultimate analysis. Gaseous fuels- Gaseous fuels: Hydrogen gas as a future fuel, production by steam reforming of methane and coke, storage and transportation. .					8
2	Optics: Electromagnetic wave nature of light, electromagnetic spectrum, reflection and refraction of a wave from a plane surface, laws of reflection and refraction, total internal reflection, plane polarized light, Law of Malus.					8
3	Corrosion Theory of corrosion. Different types of corrosion: Pitting corrosion, concentration cell corrosion, stress corrosion and soil corrosion. Factors affecting corrosion: nature of metal and nature of environment. Prevention of corrosion by various methods using metallic and non- metallic coatings like – hot dipping, cladding, electroplating and cementation and powder coating.					7

4	<p>Vibrations & Ultrasonic waves:</p> <p>Vibration as simple spring mass system, elementary and qualitative concept of free and forced vibrations, resonance</p> <p>Ultrasonic waves, properties of ultrasonic waves, Productions of ultrasonic waves by magnetostriction and piezo-electric effect, application of ultrasonic in industry</p>	7
<p>Text Books:</p> <ol style="list-style-type: none"> 1. Jain and Jain, Engineering Chemistry, Dhanpat Rai Publishing Co., sixteenth edition ,2016. 2. M. N. Avadhanulu ,P.G. Kshirsagar , A text book of Engineering Physics, S. Chand publication ,revised edition, 2015 <p>Reference books:</p> <ol style="list-style-type: none"> 1. Wiley Editorial, Engineering Chemistry, Wiley India, 2nd edition, 2012. 2. O.G. Palanna, Engineering Chemistry, Tata McGraw-Hill Education, 2009. 3. R. K. <i>Gaur</i>, S. L. <i>Gupta</i> , Engineering Physics, Dhanpat Rai Publications, 8th edition ,2001. 		

Program: B. Voc. (Industrial Refrigeration & Air Conditioning)				Semester: I		
Course: Writing Skills				Code: Code: VRC21401		
Teaching Scheme			Evaluation Scheme			
Practical	Hours	Credit	IE 1	IE 2	TW	Total
2	2	1	-	-	50	50
Objectives:						
<ol style="list-style-type: none"> 1. To introduce students to effective writing. 2. To expose students to various types of documents 3. To equip students with fundamental skills for effective written communication. 						
Course Outcomes: After learning the course students will;						
<ol style="list-style-type: none"> 1. Understand different writing styles such as descriptive and narrative writing. 2. Write summaries and persuasive letters 3. Write business emails and structured reports 4. Write job applications and resume/CV for job purposes 						
Detailed Syllabus:						
Sr No	Description					
1	Introduction to Effective Writing Skills Aspects and characteristics of writing skills. Importance of cohesion and coherence in writing.					
2	Write a descriptive paragraph: Write a descriptive paragraph about a person, place, or object. Encourage them to use sensory details and vivid language to create a picture in the reader's mind.					
3	Write a personal narrative: Write a personal narrative about a memorable event. Use descriptive language, dialogue, and reflection to make the story come alive.					
4	Write a summary and response: Read an article or essay and write a summary of the main points, followed by a personal response that explains your thoughts and reactions to the piece.					
5	Write a persuasive letter: Write a persuasive letter to a local or national government representative, expressing your opinions on a current issue or proposing a solution to a problem.					
6	Business email writing: Write a business email on a given scenario. Write a formal email, using appropriate tone, format, and language..					
7	Report writing assignment: Write a report on a given topic. Use clear prompt, a report outline, in a structured and professional format, using appropriate language and terminology.					
8	Job Application/ Cover Letter: Write a job application in a professional format with all the necessary details.					
9	Resume/CV writing assignment: Write a professional resume or CV. Use a professional format. Highlight skills,					

	experiences, and qualifications relevant to the target job or industry.
Instructions: <ul style="list-style-type: none">• First lab activity is mandatory• Any six assignments other than first lab activity to be conducted

Program: B. Voc. (Industrial Refrigeration & Air Conditioning)					Semester: I	
Course: Health and wellness					Code: Code: VRC21501	
Teaching Scheme			Evaluation Scheme			
Practical	Hours	Credit	IE 1	IE 2	TW	Total
2	2	1	-	-	50	50
Objectives:						
<ol style="list-style-type: none"> 1. Prepare graduates to become wellness, health, fitness, nutrition education or foodservice professionals. 2. Prepare students for a variety of careers in wellness, fitness, food and nutrition education and foodservice. 						
Course Outcomes: After learning the course students will be able to;						
<ol style="list-style-type: none"> 1. Students will be able to describe the principles of health and wellness from a multidimensional and interdisciplinary perspective. 2. Students will be able to think and act ethically in the context of health, nutrition and wellness. 						
Guideline:						
Total: Any 5 experiments/assignments to be conducted						
Detailed Syllabus:						
Sr.No	Description					
1	Psychology of happiness: What is happiness? What makes us happy? Socio-economic factors and happiness; Positive emotions.					
2	Can we become happier? Genetic set-point and hedonic adaptation; Sustainable happiness model and intentional activities.					
3	Happiness Activities 1: Expressing gratitude and positive thinking; Love and kindness; Avoiding overthinking and social comparison.					
4	Happiness Activities 2: Identifying signature strengths; achieving happiness with “Flow”.					
5	Is happiness sufficient? The concept of eudaimonic well-being; Self-determination and motivation.					
6	Meaning and purpose in life: The concept of meaning in life and logo-therapy; Life goals., correlation with program specific case studies.

20	20	10	-	200	-	200
Objectives: Student should be interacting with customer to understand their requirement with respect to problem in the appliance						
Course Outcomes: After learning the course students will be able to; <ol style="list-style-type: none"> 1. Apply the knowledge of HVAC system to troubleshoot the problem and repair it. 2. Engage with customer for service 3. Service, troubleshoot and repair packaged type HVAC ducted system 4. Work effectively at the workplace 5. Apply health and safety practices at the workplace 						
Guidelines: Students will take on job training in the industry in the domain of Refrigeration and air conditioning as per the following job description and personal attributes.						
Job Role: Field Engineer						
	Job Description					
	The individual at work interacts with customers to install the appliance and diagnose the problem to assess possible causes of malfunction. Once the problem and causes have been identified, the individual rectifies minor problems or replaces faulty modules for failed parts or recommends factory repairs for bigger faults					
	Personal Attributes					
	The individual must be willing to work in the field and travel through the day from one customer's premise to another. Punctuality, amenable behaviour, patience, good interpersonal relationship building, trustworthiness, integrity, and critical thinking are important attributes.					

Course Syllabus

Semester-II

Program: B. Voc. (Industrial Refrigeration & Air Conditioning)				Semester: II		
Course: Soldering, De-Soldering, and Brazing of Components & Emergency actions				Code: VRC22102		
Teaching Scheme			Evaluation Scheme			
Lecture	Hours	Credit	IE 1	IE 2	ETE	Total
3	3	3	25	25	50	100
Course Objectives:						
<ol style="list-style-type: none"> To understand the different processes of Soldering, De-Soldering, and Brazing. To have the knowledge applications and safety of Soldering, De-Soldering, and Brazing. 						
Course Outcomes:						
After learning the course, students will be able to						
<ol style="list-style-type: none"> Understand the concept of Soldering, De-Soldering, and Brazing. Describe the tooling of Soldering, De-Soldering, and Brazing. Describe the procedure of Soldering, De-Soldering, and Brazing. Understand the different applications of Soldering, De-Soldering, and Brazing. Understand the Safety Precautions in Soldering, De-soldering, and Brazing. Study the emergency actions. 						
Detailed Syllabus:						
Unit	Description					Duration (45 Hrs)
1	Introduction of Soldering, De-soldering, and Brazing: Principle of brazing and soldering, Difference between both the processes, Methods of soldering & brazing, Need of de-soldering, Methods of de-soldering					7
2	Soldering, de-soldering, and Brazing Tooling: Soldering tools, Brazing tools, Different types of soldering guns related to temperature and wattages, Types of tips, Different solder materials and their grading, Types of fluxes and its role in joining process, De-soldering basic components, De-soldering stations and their specifications,					7
3	Procedure of Soldering, De-soldering, and Brazing: Basic operational steps of soldering such as work preparation, Preparation of joint, Fluxing, and tinning, Basic steps of de-soldering, Basic operational steps of brazing such as brazing joints and surfacepreparation					8
4	Soldering and Brazing Applications Soldering: PCB Applications, Types of PCB, soldering ascii components on PCB, Check for cold continuity of PCB, broken tracks on printed wire assemblies & discrete components mounted circuit boards, Join the broken PCB track and test, Introduction of SMD Components, Identification of loose/dry solder. Brazing: Carbide tips on tools, heat exchangers, pipe fittings, electrical parts, join dissimilar metals, porous metal components					8
5	Safety Precautions in Soldering, De-soldering, and Brazing: Safety precautions while Soldering &de-soldering, safety precaution while brazing, Safety tools and equipment's.					8
6	Emergency Actions					7

	Minimum Requirements, Reporting Emergencies, Emergency exits, Primary and secondary evacuation routes, Locations of fire extinguishers, Fire alarm pull stations' location, Assembly points, Medical Services	
<p>Text Books</p> <ol style="list-style-type: none">1. Hajra Choudhury, <i>Elements of Workshop Technology Volume I</i>, Media Promoters and Publishers, 2013.2. Hajra Choudhury, <i>Elements of Workshop Technology Volume II</i>, Media Promoters and Publishers, 2014.3. Khanna O.P., <i>Welding technology</i>, Dhanpat Rai Publications Ltd., 1993. <p>Reference Books</p> <ol style="list-style-type: none">1. Lankester J.F., <i>Soldering, welding, and brazing</i>, George Allen and Unwin, 1970.2. Richard L. L., <i>Welding & Welding Technology</i>, MCGraw Hill Education Pvt. Ltd., 2018.		

Program:	B. Voc. (Industrial Refrigeration & Air Conditioning)			Semester: II		
Course:	Basics of Electrical & Electronics			Code: VRC22202		
Teaching Scheme			Evaluation Scheme			
Lecture	Hours	Credit	IE1	IE2	ETE	Total
3	3	3	25	25	50	100
Course Objectives:						
<ol style="list-style-type: none"> 1. To build strong conceptual understanding and fundamentals of basic electrical circuit, single phase and polyphase AC systems. 2. To impart basic knowledge for conceptual understanding of DC and AC machines 3. To acquire the basic knowledge of digital and analog electronics. 4. Familiarize students with various electrical measuring instruments and drives used in electrical and electronics engineering 						
Course Outcomes: After learning the course, students will be able to						
<ol style="list-style-type: none"> 1. Understand fundamental concepts of electrical engineering, DC circuits and work power and energy. 2. Apply the knowledge of single phase and three phase circuits to determine unknown electrical quantities. 3. Demonstrate the constructional features and operational details of DC and AC machines 4. Understand the concept of a number system and logic gates to implement any logic function. 5. Understand the characteristics and applications of Zener diodes, PN junction diode, LED and Photo diode. 6. Describe the different types of electrical drives and instruments used for voltage, current, and power measurements in various industrial applications. 						
Detailed Syllabus:						
Unit	Description					Duration (45 Hrs)
1	Elementary Concepts: Concept of Potential difference. Current and resistance. Series and parallel circuits, Voltage and current dividers, Power and energy calculations, Ohm's law, Kirchhoff's Law, SI units of work Power and Energy, Conversion of energy from one form to another (Electricity bill verification as an activity)					7
2	Single phase and poly phase A. C. circuits: Generation of single phase sinusoidal A.C. voltages, AC quantities, phasor representation, Pure R, Pure L, and Pure C circuits, impedance, admittance, concept of active, reactive, apparent power and power factor. (Verification of power factor for RL and RC circuit on multisim) Polyphase A.C. Circuits: Introduction to 3 phase supply and its necessity, balance three phase system, relation between line and phase quantities (with phasor diagram), power in three phase circuits for star and delta connection (Verification of line and phase values for star and delta on simulation platform)					7

3	<p>DC and AC machines</p> <p>DC Machines: Construction, working principle of D.C. generator, emf equation of DC generator (derivation not expected), working principle of D.C. motor, types of D.C. motor, Back emf (Numerical), Industrial applications. (Demonstration of machine parts)</p> <p>AC Machines: Single phase transformers: Construction, operating principle, emf equation, voltage and current ratios. Losses, Efficiency and regulation, Autotransformer. (Understating of direct loading test on single phase transformer)</p>	8
4	<p>Fundamentals of Digital Electronics: Number System: Introduction to number system, Conversion of number systems, Binary Code, 1's complement and 2's complement, Introduction to Digital Electronics: Basic logic Gates, Boolean Postulates/laws, De-Morgan Theorems. (Verification of logic gates on digital trainer kit)</p>	7
5	<p>Basics of Semiconductor: The P-N Junction Diode, V-I characteristics, Diode as Rectifier, specifications of Rectifier Diodes, Half Wave, Full wave, Bridge rectifiers, Zener Diode, Characteristics, Specifications, Zener Voltage Regulator, Types of Diodes: LED, Photodiode (Demonstration of above devices on Virtual labs)</p>	8
6	<p>Measuring instrument and drives:</p> <p>Measurement of Voltage, Current, and Power, Study of Energy meters, Use of CT and PT for measurement of power /energy in single phase and three phase Drives: Advantages of electrical and electronic drives, individual and group drive, selection of drives depending on load characteristics. (Case study on selection of drive)</p>	8

Program: B. Voc. (Industrial Refrigeration & Air Conditioning)				Semester: II		
Course: Marketing Management & Customer Relationship Management				Course Code: VRC22202		
Teaching Scheme			Evaluation Scheme			
Lecture	Hours	Credit	IE 1	IE 2	ETE	Total
3	3	3	25	25	50	100
Course Objectives:						
<ol style="list-style-type: none"> 1. To outline key marketing concepts and its application of market management. 2. To identify factors and processes essential for designing marketing strategy 3. To analyze and examine the implementation of marketing concepts, CRM and strategy to Firms. 						
Course Outcomes:						
After learning the course, students will be able to						
<ol style="list-style-type: none"> 1. Understand the concept of Marketing & Marketing Mix . 2. Understand depth knowledge about Place Mix(Physical Distribution) in the business organizations. 3. Develop in depth knowledge about Customer Relationship Marketing. 4. Understand the basic concepts of Customer relationship management 5. Apply ECRM skills relevant to the corporate world. 6. Apply relevant skills for operational Customer relationship management. 						
Detailed Syllabus						
Unit	Description					Duration (45 Hrs)
1	Introduction to Marketing Management: Introduction to Marketing and Marketing Management, Marketing Concepts – Functions of Marketing - The Marketing environment. Marketing Mix Product Decisions - concept of a Product - Product mix decisions - Product Life Cycle strategies- Stages in Product Life Cycle.					8
2	Place/Physical Distribution Mix: Meaning of Place/Physical Distribution Mix, Channels of Distribution, Types of Distribution, Level/Channel , factors which determine the choice of channels of distribution, Components, of Physical Distribution , Functions of Distribution Channel, Structure and Design of Marketing Channels Channel co-operation, conflict and competition–Retailers and wholesalers, Factors determining Inventory Level. Case Studies					8
3	Customer Relationship Marketing (CRM): Concept and definition of CRM, four main stages of CRM - Customer acquisition, Customer retention, Customer expansion, Customer reactivation, Customer relationship marketing, Benefits of Customer Relationship Marketing, Types of customer relationships, factors that impact customer relationships.. Case studies					8

4	Customer Relationship Management : Concept of Customer relationship Management, Need for Customer Relationship Management, Steps to Customer Relationship Management, Types of CRM, Key cross functional CRM processes. Acquiring customers, customer's loyalty and optimizing customer relationships, strategic frame work of CRM –origins, the role of CRM, Case studies	7
5	ECRM : Concept & Definition of Electronic Customer Relationship Management (ECRM), Features of ECRM, differences between CRM and ECRM, The benefits of ECRM, Different levels of ECRM. Tools used in ECRM.	7
6	IT System Front office and back office applications –sales force automation, call centre management, marketing automation campaign management, selecting a CRM solution. Organizing for CRM implementation, CRM change and project management. Establishing a CRM performance monitoring system –standards, metrics and key performance indicators, CRM budget and CRM return on investment.	7
<p>Text Books:</p> <ol style="list-style-type: none"> 1. Ballou, R.H., Business Logistics Management: Planning, Organizing, and Controlling the Supply Chain, 4th Ed., Prentice Hall, 1998. 2. 2	2	2	20	20	40	80
Course Objectives: This course aims at enabling students,						
<ol style="list-style-type: none"> 1. To familiarize with concepts and techniques in Elementary Calculus and Matrices. 2. To get acquainted with statistic and probability techniques. 						
Course Outcomes: After learning the course, students will be able to						
<ol style="list-style-type: none"> 1. Understand concepts of determinants and matrices and apply to solve simultaneous linear equation system. 2. Solve differentiation and integration of different types of functions. 3. Understand the concepts related to algebra of vectors. 4. Apply statistic and probability techniques on different types of numerical data. 						
Detailed Syllabus:						
Unit	Description					Duration (30 Hrs)
1.	Linear Algebra: Determinants: Definition and expansion of determinants of order 2 and 3, Cramer's rule to solve simultaneous equations in 2 and 3 unknowns Matrices: Definition of a matrix of order $m \times n$ and types of matrices, Algebra of matrices, Transpose of a matrix, Minor, cofactor of an element of a matrix, Adjoint of matrix and inverse of matrix by Adjoint method, Solution of simultaneous equations containing 2 and 3 unknowns by matrix inversion method.					7
2.	Calculus: Differentiation: Definition of derivatives, notations, Derivatives of standard functions, Rules of differentiation, Differentiation of Trigonometric, Exponential and Logarithmic function, Application of Derivatives: Geometrical meaning of derivative, tangent and normal, Maxima and minima. Integration: Definition of integration as anti-derivative. Integration of standard function, Rules of integration.					8
3.	Vectors and Three-Dimensional Geometry: Introduction to Three-Dimensional Geometry, Vectors: Definition of vector, position vector, Algebra of vectors (Equality, addition, subtraction and scalar multiplication) Dot (Scalar) product with properties, Vector (Cross) product with properties.					7
4.	Statistics and Probability: Measures of central tendency (mean, medium & mode) for ungrouped and grouped frequency distribution, Measures of Dispersion: range, mean deviation, standard deviation, Variance and coefficient of variation. Probability: Random Experiments and Events, Definition of probability, Addition and multiplication theorems of probability.					8

Objectives:						
<ol style="list-style-type: none"> 1. To introduce students to four skills of language 2. To expose students to public speaking 3. To equip students with fundamental skills for expressing thoughts in effective manner 						
Course Outcomes:						
After learning the course students will be able						
<ol style="list-style-type: none"> 1. Understand the importance of listening and reading skills 2. Write well developed paragraphs and instructions 3. Develop skills required for public speaking 4. Present themselves effectively in different contexts 						
Detailed Syllabus:						
Sr No	Description					
1	Introduction to Soft Skills with special reference to language skills Importance, need of soft skills, Soft Skills V/s hard skills					
2	Listening Skills Importance, Types and techniques for effective listening. Assignment: Listen and summarize the content.					
3	Reading Skills Tips for effective reading, Types of reading. Assignment: Read the given article/text and summarize in your own words					
4	Writing Skills 1- Paragraph Tips for effective writing, Cohesion and coherence in writing Assignment: Write a logical and well-developed paragraph on the given topic.					
5	Writing Skills 2 – Writing instructions Writing clear, concise and compete instructions Assignment: Write instructions for processes or activities					
6	Speaking Skills 1 – Self Introductions Tips for effective public speaking Assignment: Self introductions and describing job profiles.					
7	Speaking Skills 2 – Group Discussions Assignment: Group Discussions and narrative incidents					
8	Speaking Skills 3 – Presentations Assignment: Presenting ideas and thoughts before an audience.					

9	Communication Skills Types of communication and barriers to communication Assignment: Role play
Instructions: 1. First lab activity is mandatory 2. Any six assignments other than first lab activity to be conducted

Course Objectives:						
1. To understand use of computer-based system in communication and fundamentals of Internet						
2. To learn and understand MS office world using simple tools.						
Course Outcomes: After learning the course, students will be able to						
1. Demonstrate the computer components and how they are used for communication and networking.						
2. Comprehend the use of MS office and Internet Communication						
Guideline:						
Total : 6 experiments/assignments to be conducted						
Detailed Syllabus:						
Sr No	Description					
1	Study of Basic Computer fundamentals.					
2	Demonstrate and Study of different types of computer networks and internet.					
3	Create and manage professional documents using MS word.					
4	Create and manage data using MS excel.					
5	Create and manage presentation using power point.					
6	Study of Internet Communication: Email, Social Media, etc.
